

## Sacred Heart – Pupil Premium Overview 2015/2016

### Rationale

At Sacred Heart Catholic Voluntary Academy we strongly believe, (based on educational research), that children flourish and achieve when all their needs are met and they feel equipped to learn. We have classified these areas as nurture, enrichment and attainment. We feel these are interdependent and together make a strong basis for children to become independent learners and fulfil their potential.

### Plans for 2016 – 2017

The school will continue to make sure that the pupil premium funding has the most impact possible on learning throughout. The same strategies as last year will be in place, but in addition to these, we are planning to further develop additional tuition with identified children of all abilities. We take pride in continually updating our plans in the light of current accredited educational research.

We will strive to put new ideas in place that will support our pupils in making independent choices in their learning and in preparation for their lives in the real world.

### Evidence and Outcomes

#### *Pupils who:*

Are enthusiastic and have a curiosity for learning

Are confident

Are open-minded

Are imaginative

Can identify and solve problems

Work collaboratively
